About Me

I like to share knowledge by [giving](#) [talks](#), also as a [mentor](#) or simply helping others to [solve problems](#).

Currently interested in enhancing **Developer Experience (DX)** through IaC, MLOps, Documentation and Testing. Also interested in Go, Functional Programming.

Experience

July 2022 – June 2024 **Mercado Libre**, Software Engineer, Córdoba, Argentina

- Worked improving **Python DX**, maintaining tooling used by 1000s of developers in the company. (General support, features, bugfixes, version deprecation).
- Building on our Python expertise, we led upgrades for over 1,000 outdated Java applications and libraries using [Large-Scale Code Changes](#), managing the roadmap and collaborating with responsible teams to implement and monitor each update.

Jan 2021 – June 2022 **Flux IT**, Software Developer, Córdoba, Argentina

- Fullstack development to integrate 3rd party systems with internal company applications.
- Later, in a more DevOps role, I helped in the migration of the internal infrastructure to Kubernetes applying GitOps. This also led to better DX.

Education

Dec 2020 **Instituto Superior 25 de Mayo**, Computer Systems Analyst

Technologies

Languages Python, React/JavaScript, Go
Technologies Django, Pytest, Kubernetes, FluxCD, Docker
